

[INTEGRATED EXTENDABLE LOAD FLOOR ASSEMBLY FOR VEHICLES]

Abstract of Disclosure

20An integrated extendable load floor assembly is provided for a vehicle having a rear end with a floor and sides extending upwardly and along the floor to form a cargo area and a decklid for closing an upper portion of the cargo area. The integrated extendable load floor assembly includes a plurality of rails adapted to be disposed upon the sides above the floor of the rear end. The integrated drawer assembly also includes a load floor operatively cooperating with the rails for sliding movement therealong and to close a longitudinal end of the cargo area.

Patent Application No. 10/000,000

Figures

Figure 1: A diagram illustrating the structure of a document. It shows a vertical sequence of elements: a header, a main body, and a footer. The main body is divided into sections, each containing text and possibly figures or tables. The footer contains page information.
